

BIG BRAKING PERFORMANCE!

WITH PEDDERS TRAKRYDER EXTREME BRAKE KITS

**TO SUIT ISUZU D-MAX RT50 & RT85
2X4 & 4X4 MODELS**

For the discerning driver who is particular about how their Isuzu D-Max performs Pedders offers the TrakRyder eXtreme Front Brake Kit.

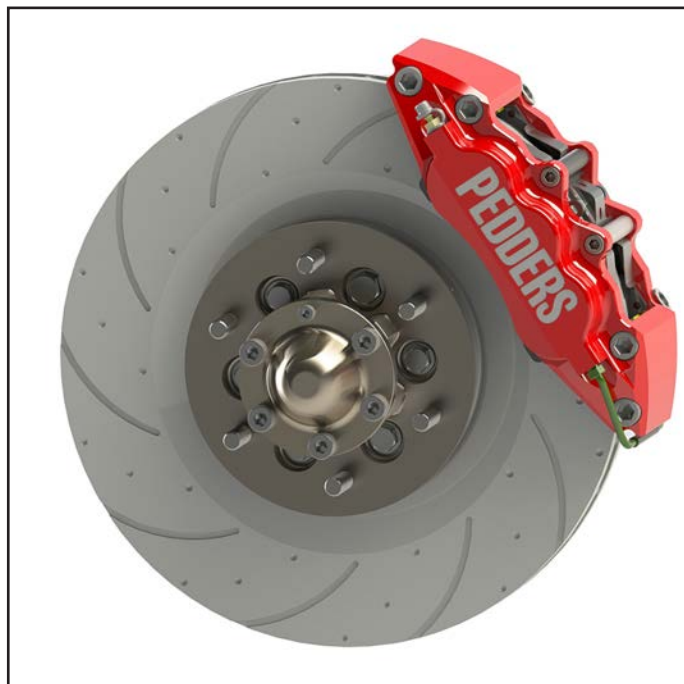

The braking performance of this kit is staggering with the inclusion of a larger 6 pot caliper design, high-tech TrakRyder eXtreme Kevlar ceramic brake pads mated with a 10-slot dimpled and Geomet-coated larger diameter rotor.

Bigger braking surface means better stopping power, and this kit provides a rotor diameter that is 56mm greater than the OE rotors. As well as the huge improvement in braking performance, the kit is well presented as the massive rotors are complemented with six-pot calipers finished in a durable red gloss finish with debossed Pedders branding in white.

Further details available in store and on our website. Suits RT50 & RT85 D-Max models.

Features:

- 356mm 10-slot and dimpled Geomet-coated rotors – 40% increase in swept area compared to OE rotors (OE rotor diameter 300mm).
- Two-piece Aluminium forged calipers
- Six forged Aluminium pistons per caliper
- Six-pot design caliper brackets and bolts
- TrakRyder eXtreme Kevlar ceramic low dust brake pads
- Stainless steel braided hoses
- High grade alloy steel brake pad insulators
- Stainless steel abutments
- Attractive and durable gloss red finish on calipers with debossed Pedders branding in white
