

ISUZU D-MAX 3670KG GVM+ UPGRADE SOLUTION FROM PEDDERS

Pedders now offers a solution for those who need to carry heavy loads beyond the vehicle's original GVM and Payload capacity. This Pedders GVM+ upgrade kit is optioned to increase axle capacities front and rear, taking the front axle to 1550kg and the rear axle to 2120kg. This maximise's your Isuzu D-Max's ability to tow and load to its full potential.

Pedders offer a support network of over 120 outlets across Australia, and all suspension components installed as part of the Pedders upgrade are backed by a Pedders 2 Year/40,000kms Nationwide Warranty. This provides customers with peace of mind and the assurance that they can rely on the quality and durability of a Pedders GVM upgrade on their next adventure.

Overall, the Pedders GVM+ upgrade kit is the best solution for those who tow or carry heavy loads. Pedders recommends you check your vehicle's GVM and Payload capacity before loading it to ensure that you don't exceed your limits and compromise safety.
