PREVENT ROLLAWAYS**

PEDDERS ELECTRIC SECONDARY PARK BRAKE™

WHAT'S YOUR BACK UP FOR PARK BRAKE FAILURE?

If you've ever tried leaving your heavily laden 4x4 on a steep incline with the handbrake engaged, you've probably felt the manual cable-operated handbrake struggle to hold the load, or worse, fail altogether. The likelihood of this occurring increases as the vehicle ages and the handbrake cable stretches or the vehicle is heavily laden – the risk of vehicle roll-away becomes very real.

PEDDERS INNOVATIVE SOLUTION

Pedders Suspension & Brakes have redesigned the OE brake calliper of the **Toyota LandCruiser Series** to incorporate an electric park brake (EPB) as seen on many new cars on the market.

PEDDERS Electric Secondary Park Brake™

HOW IT WORKS

Pedders Suspension & Brakes have redesigned the rear OE brake calliper of heavily laden Toyota LandCruiser vehicles to incorporate an Electric Secondary Park Brake as seen on many new cars on the market. When the switch is applied, or the Auto Safe Engagement is triggered, the redesigned brake calliper locks the brake pads against the brake disc preventing the vehicle from moving.

WHAT IS AUTO SAFE ENGAGEMENT?

Auto Safe Engagement is an additional layer of safety that Pedders Suspension & Brakes have integrated into the Electric Secondary Park Brake. The Electric Secondary Park Brake is automatically engaged once the vehicle is turned off, with select kits also engaging when the driver's door opens, or the driver's seatbelt is unclicked.

PEDDERS ELECTRIC SECONDARY PARK BRAKE RANGE

PART #	F/R	APPLICATION	BENEFITS
TOYOTA LANDCRUISER 70 SERIES (PRE FACE LIFT)
